

# ABESI

Access to Biomedical Electronic Scientific Information

- FAST
- EASY
- NO COST TO INVESTIGATORS\*

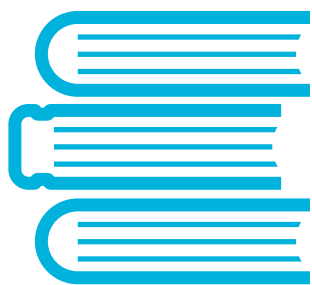

## WHAT IS THE ABESI?

The ABESI project is a core servicing the PR-INBRE Network Institutions and its mission is to enhance investigators productivity and competitiveness by facilitating and improving timely access to scientific articles and other information needed by investigators' community in their research work.

## HOW TO GET SCIENTIFIC ARTICLES?

ABESI has reached an agreement with the UPR-Recinto de Ciencias Medicas Library (RCM) by which all investigators in PR-INBRE institutions may obtain full-text scientific articles in electronic format at no cost to investigators, (costs will be paid by ABESI), providing that such articles are not in their institution's holdings. Articles must be requested on-line using the LOANSOME DOC system, as Inter-Library-Loan (ILL) operations from any PC connected to the Internet, and will be delivered by email to the address specified by the user. Users must be registered with ABESI and also must register in LOANSOME DOC.

**TIMELY ACCESS  
TO SCIENTIFIC  
ARTICLES**

## CONTACT ABESI

If you have a question about ABESI or if you would like to benefit from ABESI services, please send an e-mail or call

**Mrs. Moraima Guzmán**
